

# COMPLETE SEALING SOLUTION

ISO 9001 : 2008

Our technical advice is based on our many years of experience, latest technological knowledge & extensive testing. However, due to the vast variety of possible deviation in each application no guarantee is possible to be given or liability accepted for correctness, operability & durability. Subject to alterations

The stated operating conditions are general indications & these may be exceeded in certain cases. In the case of prolonged duty cycle, operation involving impact or other difficult conditions, it is not advisable to reach all these limits simultaneously. Kindly contact us for suitable proposal in such cases.

ASPL Sizes Reference List	15-26

## OUT MOTTO-SUPERIOR CUSTOMER SERVICE

**Unique Process:** Our Computerised seal manufacturing technology is one of its kind in the world! We don't need moulds or minimum ordering quantities-be it standard or non standard requirement. You can order 1 piece or 100 and can pick them up the same day!! Accuracies achieved are in microns.

**Range of Sizes :** Almost all profiles-more than 100 preprogrammed on computer are manufactured at our plants in the range of 10 mm mm ID & 500 mm OD. We guarantee - imported raw materials !!

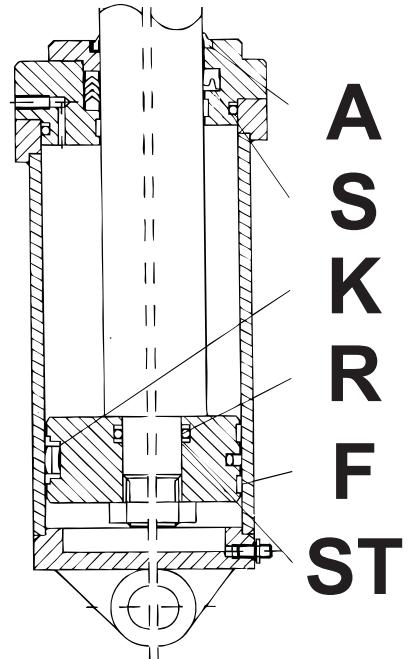

**3 Days Despatch :** AnkSeals is aware of your delivery requirement which is "NOW" Our INSTANT Seal manufacturing system enables us to manufacture and ship out to you in 3 days flat almost anywhere in India!!

**JIT (Just in time) Inventory :** Our guaranteed despatch within 3 days enables you to rely on us for Breakdown maintenance requirements. This means no large stocking & risking parts obsolescence & funds blockage.

**100% Guaranteed Satisfaction :** AnkSeals endeavors to be your most reliable source for seals quality wise & delivery wise. Extra efforts will be taken to win your "SEAL OF APPROVAL"

**Technical Support :** Our own technical capability & consultation are available to you "Free of Cost". Just Call or Fax and tell us your problems & you will receive your solution latest within 2 days.

**Seals & Sealkits :** Make your own Sealkit-We manufacture almost all cylinder seal components by turning including 'O'RINGS !!!

### HOW TO ORDER

Please order in following format  
Profile/ Housing Size/ Material

#### Example:

1. K 1/100\*\* x80\*\*x10\*\* Hpu.
2. S10-12/200(h)x230(h)x50(h)ERI\_ETL

\*All housing sizes shown in the profile diagram are required

\*\* Please mention (h) for housing size and (s) in case of seal dimension.

### ONE PHONE CALL / FAX SERVICE

**CALL US ON-(91)07104-234210, 325094**

**OR FAX US ON- (91) 07104-232378**

OFF / WORKS - U- 149, MIDC HINGNA, NAGPUR - 440 016

## IMPORTANT FACTS ABOUT SEAL MATERIALS

Material	Properties
Ank Polyurethane <b>HPu</b>	<p><b>HPu is a hydrolysis</b> resistant polyurethane elastomer. It offers excellent resistance to abrasion &amp; hydrolysis which is otherwise rarely found in Polyurethane. It is stable in water upto 90°C (Hydrolysis is degradation in water)</p> <p><b>HPu is resistant to :</b> Mineral oils &amp; greases, Fire resistant HFA, HFB, Biologically degradable hydraulic fluid &amp; water upto 90°C.</p> <p><b>HPu is not resistant to :</b> Alkalies &amp; acids</p>
Ank Polyurethane <b>HPu 57D</b>	<p><b>HPu 57D</b> is a hydrolysis resistant PU. The hardness is adjusted at 57 2 shore D which makes it an excellent extrusion resistant material.</p>
H-NBR Black <b>HER1</b>	<p><b>HNBR is a hydrogenated acrylonitrile butadiene rubber. :</b></p> <p><b>HNBR is resistant to :</b> Aliphatic hydrocarbons such as fuel, propane &amp; butane, mineral oils &amp; gases (resistant to short temperature loads of upto 170° C), vegetable &amp; animal fat or oil, diluted acids, alkalies &amp; salt solutions even at elevated temperatures, as well as glycol in water &amp; silicone oils &amp; greases if these contain anti corrosives, eg. radiator antifreeze.</p> <p><b>HNBR is not resistant to :</b> Fuels with a high content of aromatic compounds (four star petrol, alcohol mixture), ketones, esters, ethers and chlorinated hydrocarbons such as trichloroethylene or tetrachloroethylene.</p>
NBR Black <b>ER1</b>	<p><b>NBR</b> is an elastomer based on acrylonitrile butadiene rubber which is used for U-cup seals, lip seals, chevron packings, special seals and various components. Due to its good resistance to the majority of mineral oil-based oils &amp; greases, NBR is the material most frequently used in hydraulic &amp; pneumatic systems.</p> <p><b>NBR is resistant to :</b> Mineral oils &amp; greases of HFA, HFB &amp;HFC pressure fluids. Vegetable &amp; animal oils &amp; greases, fats, water &amp; seawater upto approx 100°C.</p> <p><b>NBR is not resistant to :</b> Glycol based brake fluids, HFD Fluids, aromatic &amp; benzene chlorinate hydrocarbons, esters, ketones, amines, concentrated acids &amp; bases.</p>
Viton® Brown <b>ER2</b>	<p><b>Viton® is an elastomer</b> based on Fluorine rubber. (Viton= registered trademark of Du Pont) which is used for U-Cup seals, lip seals, chevron packings, wipers, various components and special seals. Its outstanding properties are its high resistance to heat, chemicals, weathering and ozone. Viton is highly resistant to all mineral oil-based &amp; synthetic - based hydraulic fluids.</p> <p><b>Viton® is resistant to :</b> Mineral &amp; synthetic oils &amp; greases containing sulphur, fire resistant fluids HFD (Phosphorous ethers &amp; chlorinated hydrocarbons based) fuels, aliphatic, aromatic &amp; chlorinated hydrocarbons, most inorganic acids in corresponding mixtures.</p> <p><b>Viton® is not resistant to :</b> Anhydrous ammonia, caustic soda, caustic potash solutions, ketones, ethers, amines, low molecular organic acids, such as formic &amp; acetic acids.</p>

Material	Properties
Teflon PTFE Virgin White EF1	<p><b>PTFE Virgin</b> is polytetrafluoroethylene which is used for backup rings, chevron packings, O-rings, seals and gaskets. PTFE Virgin is a material with the widest technical range of applications. PTFE Virgin has lowest coefficient of friction. Static &amp; dynamic friction are virtually identical. Depending on the load virgin PTFE has a tendency to creep or cold flow (at relatively low loads), For this reason pure PTFE is not used for sealing parts in hydraulic systems.</p> <p><b>PTFE Virgin is resistant to :</b> Virtually all Chemicals.</p> <p><b>PTFE Virgin is not resistant to :</b> Liquid alkali metals &amp; gaseous fluorine compounds at high pressures &amp; temperatures.</p>
PTFE With fillers Grey EF2	<p><b>Filled PTFE</b> is polytetrafluoroethylene with glass fibre &amp; MoS<sub>2</sub> fillers which is used for glide (Slide) rings, low friction seals, thrust collars and bearing rings for chevron packings and guide rings. As a result of the special fillers Teflon achieves high firmness values at low creep when compared to pure PTFE. These additives reduce thermal expansion, increase thermal conductivity, improve wear resistance &amp; resistance to permanent deformation (cold flow). Since the material has no rubber-elastic properties, they are usually always used in conjunction with rubber - elastic materials or metal springs which provide the necessary contact pressure &amp; preload</p>
POM (Acetal) Black ETL	<p><b>Acetal</b> is a polyoxymethylene plastomer. It is used for making anti-extrusion rings, guide ring bushes, scrapers and other high precision rotating parts. One of the most important thermoplastics with very good mechanical properties, low water absorption and good chemical resistance.</p> <p><b>Acetal is resistant to :</b> Any mineral oil grease HFA, HFB &amp; HFC fluids.</p> <p><b>Acetal is not resistant to :</b> Concentrated acids and alkaline solutions.</p>
Polyamide PA Black EMD	<p><b>Polyamide</b> has good sliding properties which is used in guide rings and bearing components. This material is used instead of Acetal for components from 250 mm upwards. Ecomid absorbs up to 8% water.</p> <p><b>Polyamide is resistant to :</b> Mineral oil &amp; greases, HFA, HFB &amp; HFC fluids.</p>

◆ ◆ ◆

On request we will supply various materials for special applications.

#### EXPLANATIONS OF ABBREVIATIONS

**HFA** : Fire resistant fluids, oil in water  
**HFB** : Fire resistant fluids, water in oil

**HFC** : Fire resistant fluids, water /glycol  
**HFD** : Fire resistant synthetic fluid.
